

## WHAT WE DO

Assay Depot is an *online marketplace for pharmaceutical research services*. Designed by scientists for scientists, the marketplace makes it easy for you to compare competing providers and then place online orders for the research services you need. Marketplace providers have already signed contracts with Assay Depot covering confidentiality, pricing and performance. You simply register once with Assay Depot and then order services when you need them, without the hassle of repeated legal discussions, price negotiations and other account set-up activities. Assay Depot also works closely with the Provider to ensure the on-time delivery of a high quality data report. In this unique way, Assay Depot brings the true benefits of outsourcing to the bench scientist, and fundamentally improves the way drug research is done.

## HOW TO ORDER FIXED-PRICE SERVICES

## HOW WE ARE DIFFERENT

- Order services and products online in minutes
- Register only once to access all providers
- View published prices for standard services
- Request multiple quotes for custom services
- Get the marketplace price match guarantee
- View customer reviews of services and products

## MANAGEMENT
